

ZigBit™ Development Kit

Getting Started

Thank you for purchasing the 802.15.4/ZigBee Development Kit from MeshNetics. Now you have the easy-to-use tools to quickly develop and test the wireless sensor network application. The Development Kit includes:

With our Development Kit you can...

- Develop brand new market-ready product with wireless connectivity
- Create your custom application based on ZigBeeNet API
- Prototype and test your devices
- Enjoy our assistance through all stages of product development, including module integration, sensor interfacing, component selection, antenna design and more
- Have extended technical support by e-mail

How to get started

The first step to start using the Development Kit is installing the software. After opening the box, please insert the "Software & Documentation" CD into your CD-ROM. Then follow the instructions of the installation wizard. Start the installation wizard by double clicking on the .exe file "MeshNetics ZigBit Development Kit (v 2.0)" and you will then be guided through the installation process. After the installation process is complete, please refer to the User Guide found in the folder "MeshNetics" in Windows Start Menu. Should you require further guidance, please contact technical support.

NOTE: End-User License Agreement (EULA) and Support Terms are available on CD-ROM. By using this MeshNetics ZigBit Development Kit you acknowledge that you have read the EULA and accept the terms thereof. If you do not agree to be bound by the terms of the EULA, then do not use the Kit, and return it to your place of purchase.
